Work Experience

Comerline – Granada, Spain
Full Stack Developer | 2023 – Present

Hospital System: Developed a Node.js API, improving internal communication and speeding up key administrative processes.

Medical Ecosystem (Zend Framework 2): Optimized and refactored legacy modules and created new features used daily by hundreds of healthcare professionals.

Congress Management Platform (Laravel + React): Developed features for a conference management system, supporting registrations, payments, ticket management, and coordination of technical and scientific areas.

Flutter Application: Built a multiplatform app (Android, iOS, Web) as part of an enterprise management system, helping digitalise and streamline internal workflows.

Translation System – Ofilingua: Led the migration from PHP 5.6 to PHP 8.0 (Laravel + React), significantly improving performance and maintainability.

DevOps: Managed deployments, Linux server administration, service monitoring, and contributed to AWS infrastructure management.

Funky Buddha – Marbella, Spain
Manager | 2022 – October 2023

Oversaw daily operations in a high-demand nightclub environment, coordinating staff, managing customer flow, and ensuring service quality. Developed strong leadership, team management and problem-solving skills under pressure.

Full Stack Software Engineer with 3+ years of experience building and improving digital products across healthcare, enterprise management and large-scale event platforms. I've led the development of critical systems, improved internal workflows, modernised legacy platforms and contributed to high-impact features used daily by hundreds of professionals.

I enjoy working closely with teams and giving my best to every project, helping deliver reliable, meaningful improvements that bring real value to both users and the company.
